

ABSTRACT OF THE DISCLOSURE

A reflecting-mirror-equipped lamp **2000** is constituted by a high pressure discharge lamp **150** and a reflecting mirror **300**. The reflecting mirror **300** includes a wide opening **310** and a narrow opening **320**. A first sealing portion **101a** of the high pressure discharge lamp **150** is fixed near the narrow portion **320** of the reflecting mirror **300**, and provided with no base. A second sealing portion **101b** of the high pressure discharge lamp **150** is provided at a side of the wide opening **310** of the reflecting mirror **300**. An external lead **104** of the first sealing portion **101a** and an outward-drawn lead wire **204a** are joined to each other by the plastic flow of a caulking member **10**.
